PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 1+ year of professional experience designing and delivering end-to-end web features across both frontend and backend systems. Builds responsive, component-driven UIs in Angular while developing the APIs and services that power them — using PHP Laravel/Lumen and PostgreSQL. Experienced in framework modernization, AI-augmented development with GitHub Copilot, and workflow automation via n8n. Recognized as part of a Squad of the Year award-winning team, with a track record of owning full delivery cycles from UI to infrastructure in fast-paced Agile environments.

PROFESSIONAL EXPERIENCE

Associate Software Engineer I

Cloudstaff · Remote

Apr 2025 – Present

- Delivered features across two production applications built on Angular frontends and Lumen/Laravel backends, contributing across the full stack from UI components to API integrations.
- Led framework modernization efforts, including major version upgrades of Angular and Laravel/Lumen from legacy releases to current stable versions across two production applications — resolving breaking changes, dependency conflicts, and performing systematic codebase refactoring.
- Upgraded a long-running application spanning several years of active development, and separately modernized a high-traffic legacy system serving over 10,000 users — ensuring stability and continuity throughout both migration efforts.
- Built and maintained RESTful APIs and end-to-end full-stack features, owning functionality from frontend flows through to backend business logic and database queries.
- Adopted an AI-augmented development workflow using GitHub Copilot for prompt-driven code generation, iterative refactoring, and assisted debugging — improving personal engineering throughput and delivery speed.
- Designed and implemented n8n-based automation workflows for API orchestration and system-to-system integrations, reducing manual integration overhead and improving reliability.
- Performed cross-layer debugging across frontend, backend, and third-party integrations, including production incident resolution and structured root-cause analysis.
- Improved codebase quality through unit testing, Postman-based API validation, and structured peer code reviews focused on maintainability and coding standards.
- Collaborated with QA, product, and engineering teams across Agile sprints, supporting deployment pipelines across dev, staging, and production environments.
- Recognized as a consistent high performer — part of a team awarded Squad of the Year.

Associate Software Engineer — Trainee

Cloudstaff · Remote

Feb 2023 – May 2023

- Completed intensive bootcamp covering Angular, SQL, Git, and REST API testing with Postman.
- Contributed to live projects using Angular for frontend development and PHP Lumen for backend services.
- Built REST APIs and integrated AWS S3 for file uploads and cloud storage workflows.
- Resolved bugs and delivered small features as part of regular Agile sprint cycles.
- Strengthened collaboration and problem-solving skills through daily team communication and standups.

TECHNICAL SKILLS

Front End	Angular, WordPress, HTML5, CSS3, Responsive Design, Component-Based Architecture
Back End	PHP (Laravel, Lumen), RESTful API Design & Development
Databases	SQL, PostgreSQL, Database Design & Query Optimization
Cloud & DevOps	AWS, Linux, Bash Scripting, Application Deployment
AI & Automation	GitHub Copilot, n8n Workflows, Claude, GPT, Gemini, AI-Augmented Development
Tools & Methods	Git, GitHub, Postman, Jira, Agile/Scrum, Unit Testing, Peer Code Reviews

EDUCATION

Bachelor of Science in Information Technology

Our Lady of Fatima University · 2019 – 2023

CERTIFICATIONS

Philippines Civil Service Professional Eligibility

CORE COMPETENCIES

Adaptability · Problem-Solving · Clear Communication · Cross-Team Collaboration · Continuous Learning · Openness to New Ideas ·
Strong Work Ethic · Self-Motivation
